

# Frontend Test by Native Brains

## Frontend Techs

React.js/Vuejs use any one of these

## Description:

You have to create news feed using tailwind Css and state management using “React(Redux, Saga) / Vuejs(Vuex, Pinia)”

Kindly use functional components and make every part of the screen in components

Design should be responsive

Use PostCss to remove unused classes in Tailwind.

## Requirements:

- Create post { body(including feelings to set emoticons), username (static), created\_at }
- Edit post
- Delete post
- Create comment section on post with emoticons
- Edit comment option on post
- Delete comment on post
- Need to add like or dislike options
- Need to add comments count

## How to submit:

When you created the design as per the requirements you need to create a Github Repository and share the Public Repository to us.
